

HELP MAKE GLASGOW A SUSTAINABLE FOOD CITY

Work is underway to create a plan that will put Glasgow on the path to a holistic, joined up food system. We want to make sure good food is available to everyone.

Over 80 partners from across different sectors - community, academic, local authority, public and private - are working together to agree a 10 year action plan.

In April 2020 we will start running a consultation to find out what you think about the Glasgow City Food Plan, so look out for workshops and events where you can get involved!
